

THE COMPLETE TOOL to MONITOR YOUR ELECTRICAL POWER

Slash your Electric Bill

Payback in Months!

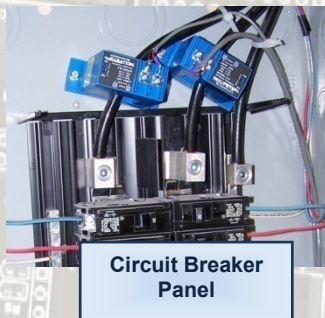

***Immediate Power Readout
to Analyze Usage***

Application

- Track power usage with PC-gauges, charts and tables.
- Major benefit for small investment of time and effort.
- Turn-key solution includes all hardware and software components - including a Netbook computer.
- Instant visual feedback of equipment power-usage.
- Capture and display electrical cost trends.
- Reveal "unseen" electrical power-usage.
- Identify power reduction opportunities.
- Log power reduction initiatives and their impact.
- Take advantage of low cost electric utility pricing plans.
- Provides actionable user-facility power-usage data.
- Emergency alerts via cell phone or e-mail.

Features

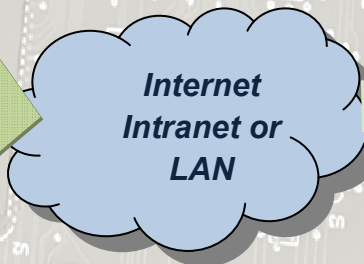

- Complete solution – all hardware and software.
- Simple to install and easy to operate.
- Remote feedback using local or Internet access.
- Graphs, gauges and tables.
 - Powerful, intuitive visual impact.
 - User configurable; drop down list selection.
- Easy installation
 - No power interruption
 - 30 to 60 minute setup
- Scalable, expandable deployment of sensors.
- Rugged construction.
